

Mazda Accessory Fitted A2DP Bluetooth® Kit

Pairing and Connecting

Bluetooth Audio Transmitter not connected to iPod

1. Switch on Ignition.
2. Plug the *Bluetooth* Audio Transmitter into the iPod to begin the pairing and connecting process.
3. While searching, the light on the *Bluetooth* Audio Transmitter will flash quickly. Once connected, the light will flash twice per second.

Bluetooth Audio Transmitter connected to iPod

1. Switch on Ignition.
2. Turn the iPod on by pressing any button on the iPod.
3. Press play button once to begin the pairing and connecting process.
4. While searching, the light on the *Bluetooth* Audio Transmitter will flash quickly. Once connected, light will flash twice per second.

Streaming Audio to Radio

1. Once the *Bluetooth* Audio Transmitter has connected, music will begin to stream automatically.
2. Change radio to AUX mode.

Note:

Connecting any other media device to the vehicle AUX IN jack will deactivate the *Bluetooth* Audio Transmitter audio streaming.

Stand by / Not Connected - Flash once every two seconds

Note:

If you are connecting a mobile phone and the *Bluetooth* Audio Transmitter to the *Bluetooth* kit, it is highly recommended that you connect the phone first.

Troubleshooting

Problem

Cannot pair or connect the *Bluetooth* Audio Transmitter to the *Bluetooth* Kit

Cause and Solution

1. Ignition is turned off. Turn on ignition.
2. *Bluetooth* Audio Transmitter pairing time expired. Reset the *Bluetooth* Audio Transmitter by disconnecting it from the iPod and then repeat pairing procedure.
3. Another A2DP device is already connected to the *Bluetooth* kit. Press and hold the '-' button on the switch microphone until a tone is heard. Redo pairing procedure.
4. iPod battery low. Connect the charging cable. Redo pairing procedure.

No iPod audio can be heard

1. Ignition is turned off. Turn on ignition.
2. Volume is on mute or set too low. Adjust volume from vehicle's audio system.
3. iPod battery low. Connect the charging cable. Redo pairing procedure.
4. The *Bluetooth* Audio Transmitter is not connected to the *Bluetooth* kit, re-connect the *Bluetooth* Audio Transmitter.
5. Radio is not set to Auxiliary input. Set radio to Auxiliary input.
6. iPod is paused. Press play button.
7. Another media device is connected to the vehicle AUX IN jack. Remove any plug from vehicle AUX IN jack.

No iPod functionality through the *Bluetooth* Kit

1. *Bluetooth* phone is connected and active/in call. iPod functionality is not present when phone is active/in call.
2. *Bluetooth* remote control profile is connected to phone instead of the *Bluetooth* Audio Transmitter. Press and hold the '-' button on the switch microphone until a tone is heard. Redo pairing procedure.

Cannot adjust volume from the iPod

1. Volume from the *Bluetooth* Audio Transmitter is fixed. Adjust the volume from the vehicle's audio system.

Note:

Do not leave the iPod in the vehicle for prolonged periods of time as heat and humidity may damage it.

iPod is a trademark of Apple Inc., registered in the US and other countries.

Mazda Factory Fitted Bluetooth® Kit
