Charging and data cable 3-in-1 for USB-A

000 051 445J

Data connection | Charging | Entertainment

Connection and charging, without restrictions. With this 3-in-1 charging and data cable, you can **connect devices to your car's infotainment** using all the most common connectors, such as **USB-C, Micro USB and Apple Lightning**. The cable allows for the data connection of smartphones and tablets, as well as using services like Android Auto or Apple Car Play (if these services are activated in your car).

You can also use it for streaming music and, of course, for charging.

At the same time there can be only one device connected with this charging and data cable 3-in-1.

It is not possible to connect/charge more than one device at the same time.

For connecting to the car, the standard USB-A connector is used. For USB-C equipped cars, the adapter **000 051 443H** is available.
